

EXCELLENCE RESEARCH INTERSHIP PROGRAM

CONDUCT RESEARCH
DURING THE SUMMER IN
THE HEART OF EUROPE

SCIENCE & ENGINEERING RESEARCH INTERSHIPS

Looking for a stimulating and practical experience in a leading university?

EPFL, the Swiss Federal Institute of Technology in Lausanne, offers a supervised research program to outstanding students enrolled in partner universities from Canada, the USA and Singapore.

Benefiting from cutting-edge facilities and technology, EPFL's research community is diverse, committed and internationally recognized for the excellence of its scientific output and collaborative environment.

Selected candidates will experience this unique research environment while enjoying the Swiss idyllic surroundings. Located on the shores of Lake Geneva and at the foot of the Alps, Lausanne is a small town with plenty to offer to curious explorers. It is also a perfect base camp for weekend excursions to attractions in the country or to European capitals.

EPFL Facts & Figures:

- 15,000+ students
- 130+ nationalities
- 29 Master's and 22 PhD programs
- 500+ laboratories and research groups
- Top European engineering rankings

JOIN OUR TREMENDOUS RESEARCH COMMUNITY

Following EPFL Schools offer 3-month lab internships (possible to extend under certain conditions):

- School of Architecture, Civil and Environmental Engineering
- School of Basic Sciences
- School of Computer and Communication Sciences
- School of Engineering
- School of Life Sciences

If you are interested, please contact your home university's international exchange office for details on the application process.

Candidates must be registered as regular students in their home institution when they undertake the internship. Note that it is possible to combine a research internship with an exchange program.

An Excellence scholarship will be awarded to all candidates selected for an internship.
